

Sizewell Concerns

This exhibition shows how EDF's plans to build two new reactors - Sizewell C&D - could affect you.

It recommends how you can stand up for this special corner of Suffolk during Stage 4 consultations.

Our community does not oppose Sizewell C&D in principle. However EDF's plans:

- place an **intolerable burden** on our communities
- threaten to **overwhelm** this uniquely **biodiverse environment**

East Suffolk is facing **SEVEN energy projects** that threaten to industrialise the area. We urgently need:

- More **"joined-up" strategic planning** from councils and government.
- A **much more imaginative and sensitive approach** by EDF and other developers to protect this special area and our quality of life.

This exhibition is presented by:

Theberton & Eastbridge Action Group on Sizewell. TEAGS was formed in 2013 to represent residents' concerns about EDF's accommodation, transport and environmental plans. It has the full support of the Parish Council. www.teags.org.
The B1122 Action Group, formed in 2013 to press EDF for a dedicated road from the A12 to the Sizewell C&D construction site. <http://sizewellrelief.weebly.com>.
The Minsmere Levels Stakeholder Group monitors the management of the water catchment area of the Minsmere River, Leiston Beck and Leiston Drain, its subsequent discharge through the Minsmere Sluice to the sea, as well as the state of coastal erosion across the Minsmere Haven area. <http://minsmerelevelsstakeholdersgroup.onesuffolk.net>.

Key Concerns

- **Multi-storey campus and car park for 2,400 workers adjacent to Eastbridge.**
- **Over 1000 HGVs a day, vans cars and buses and 1500+ car park for daily traffic.**
- **Two reactors shoehorned into 32 hectares when 30 hectares is recommendation for one reactor**
- **Threats to the most biodiverse UK wildlife habitat and fragile Heritage coast.**
- **Noise and light pollution, driving visitors away for at least 10 years.**

Suffolk County and Suffolk Coastal District Councils at Stage 3:
"The Councils are still not able to support all the specific proposals put forward by EDF Energy and the impacts of the proposed development are still not yet fully developed or evidenced."⁽¹⁾

Royal Society for the Protection of Birds (RSPB):
"The RSPB still believes that Sizewell is not a suitable location for a new nuclear power station"⁽²⁾
