

14 May 2020

Dear Mr Collins and Ms Downes,

Jean-Bernard Lévy has asked me to confirm that he and other EDF Board members received your letter of 5 May 2020. He thanks you for your interest in EDF and our project.

We appreciate that some people have concerns about the Sizewell C project, although many others are equally keen for it to progress quickly. We welcome this diversity of viewpoints, which contributes to making the project the best it can possibly be.

EDF is committed to a net zero future with renewables and nuclear at the heart of a mix of low carbon electricity generation. Sizewell C is a project that will deliver for Britain clean, affordable and reliable power, as well as generating thousands of jobs and opportunities for British businesses.

The project has conducted four rounds of public consultation. The proposals will be further investigated through the rigorous process to be run by the Planning Inspectorate.

Should you have any further questions or correspondence please contact my colleague Tom McGarry at Sizewell C Information Office in Leiston on 01728 833891.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Simone Rossi".
